

AUTOMATED DOCUMENT CATEGORISATION & INDEXING VIA CONTENT

Cognitronics Intelligent Classification Solution (CiCS) automates the manual task of mailroom document sortation and distribution by intelligently classifying scanned documents and electronic documents based on their content.

CiCS extracts all content, classifies on that content which then allows indexing of the document by seeking identified key business fields. Once classified and indexed the documents are automatically moved into the appropriate workflow, DMS or archived.

Minimal or No User Intervention

Powerful Unrivalled Recognition Techniques

User Friendly – Very Easy to Use

Fast Return on Investment with Substantial Cost Savings

Cost Saving – Time Saving

IMPROVED EFFICIENCIES

Once installed you will find an immediate benefit in the time taken and accuracy documents are classified, indexed and routed. CiCS will provide significant Time and Cost efficiencies to most organisations, leaving your Users free to perform tasks better suited to the business.

COST SAVINGS

CiCS is easily integrated into your current infrastructure with minimal or no hardware costs involved. The ease of integration is quick and efficient with instant benefits seen from the outset.

DEMONSTRATION

We are excited and enthusiastic as to the business benefits this product immediately gives to most organisations. Cognitronics would like to demonstrate at your offices with absolutely 'no obligation' on your part, in fact why not provide us with typical samples for a 'Real-Time' demonstration so we can show the true strength of CiCS.

REDUCE YOUR PROCESSING COSTS, IMPROVE YOUR ACCURACY & SAVE TIME
